

IS Green Bonds

Objective and investment policy

IS Green Bonds is an Investment fund with a focus on investing in domestic issuances listed on ICE Sustainable Bonds or First North ICE Sustainable Bonds at Nasdaq Iceland. The fund may also invest in bonds and bills issued by the Icelandic Treasury and/or by government institutions.

Bonds listed on Nasdaq Sustainable Bonds are bonds that are issued in order to finance projects that promote sustainability and/or positive development in environmental and social issues. Issuers can, for example, be governments, municipalities, financial institutions or corporations.

Risk and disclaimer

Information in accordance with Article 47 of Act no. 45/2020 on Alternative investment Fund Management companies

Íslandssjóðir's risk management conducts regular stress tests for Íslandssjóðir's alternative investment funds. Stress tests assess the impact of different scenarios on funds' portfolios under normal and exceptional liquidity conditions.

The risk and reward indicator demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Risk factors that affect the value of a holding in the fund but the risk indicator does not cover are credit risk, liquidity risk, counterparty risk and operational risk.

Risk management monitors the funds' investment on a daily basis and whether investments are within risk limits. If a fund exceeds limits, e.g. due to market conditions or flow in or out of the fund, the fund manager is notified without delay and appropriate measures are taken. In the event of a violation of law requirements, it is reported to the Financial Supervisory Authority. Various financial risks are always related to investment activities, such as the risk of no yield or the risk of losing the capital invested. It should further be noted that international investing includes risks related to political and economic uncertainties as well as currency risk. **Past performance does not indicate nor guarantee future performance of an investment.** The Fund seeks to diversify its investments and minimise fluctuations on the price of the Fund as a result of market situation. Investing in the Fund does involve risk. The Fund's price can decrease as well as increase. The price and return of the fund reflects market fluctuations, if interest rates rise, bonds at a fixed income rate drop in value and bonds with long maturities drop more than short-term bonds, based on the same changes in yield. Investment in mutual fund is, however, less risky than investments in individual securities. Investors should bear in mind that investing in a mutual fund does involve risk, the value of assets in a fund may at some point be lower than earlier point during the period of ownership. Each investor's investment objectives and financial situation is different. Before making an investment decision, it is important to seek expert advice and familiarise oneself with the investment market and different investment alternatives. Investors are encouraged to familiarise themselves with the IS Focus Fund - Rates prospectus, especially regarding risk. The funds prospectus and simplified prospectus are available on www.isfunds.is
